

TECNOLÓGICO  
DE MONTERREY®

# END-TO-END SUPPLY CHAIN STRATEGY

---

**Reproductive Health Services**

**Dr. Carlos Brambila Paz**  
**Tecnológico de Monterrey**

**2014 Health and Humanitarian Logistics Conference**  
**Tecnológico de Monterrey, Mexico City**  
**June 4-5, 2014**

# Reproductive health services

- Family planning and contraceptives
- Maternal and neonatal health
- Sexually transmitted infections (STIs) and HIV/AIDS prevention

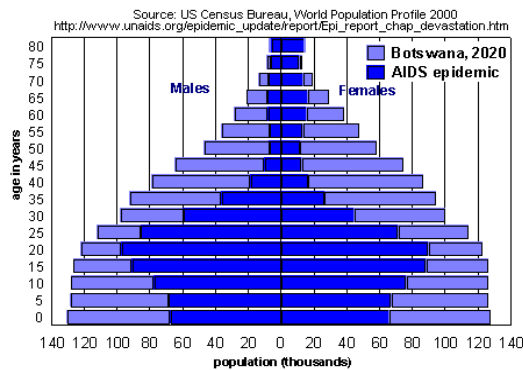

# Reproductive health commodities

Condoms, injections, IUDs, implants, contraceptive pills	Contraceptives, oxytocics, prevention & treatment of eclampsia
Medicines to support sexual and reproductive health, maternal health	Medical equipment including prenatal and postpartum care, sterilization, postpartum IUDs

# Impact

Failure to provide high quality and timely commodities has demographic consequences such as an increase in the number of unwanted pregnancies, pregnancy and delivery complications, as well as the risks of spreading STIs.

## Demographic impact of AIDS

## Refugees

## Indigenous populations

# Supply chain strategy: UNFPA

**Careful planning of demand forecasting by type of commodity + Quality assurance standards and procedures + Price negotiation + Logistic strategies + Funding + Operational procedures + Capacity development + Information flows = EtE**

# Barriers and challenges
